Platform Offerings

Threat Monitoring

24x7 monitoring of assets for any intrusion or exfiltration attempts, that can lead to severe business impact.

Log Management

Track, store and analyze security-related data, enabling effective threat detection and response.

Compliance

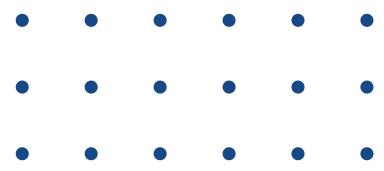

Monitor compliance with industry standards and regulations, including HIPAA, PCI DSS, and GDPR, NIST 800-53, etc.

Managed SecOps

SayCure provides managed security operations to optimize security strategies and reduce the risk of cyber threats.

Service Offerings

Automated Response

Automatics containment of threats and analysis by orchestrating various threat intelligence platforms.

Vulnerability Detection

SayCure detects vulnerabilities in systems and applications through agent based scanning to identify gaps in end hosts.

Integrity Monitoring

SayCure's integrity monitoring checks files and registry for unauthorized changes, ensuring the integrity and security of critical data.

Threat Intelligence

SayCure leverages multiple threat feed to enrich existing data for emerging threats and protect against advanced attacks with proactive measures.
